Sudheendra S

Software Engineer | Distributed Systems | Cloud Computing
Greater Boston

Summary

As a software engineer and a master's student in software engineering at Northeastern University, I am passionate about developing innovative and scalable solutions for complex problems. My coursework covers various topics related to front-end, back-end, and cloud technologies, such as web development, database systems, distributed computing, and software design.

I have two years of professional experience as a software developer at Salesforce, where I worked on multiple projects involving Salesforce CRM, Apex, Visualforce, Lightning, and REST APIs. I also completed a software engineering internship at Resideo, where I developed a browser extension using machine learning and VirusTotal to detect malicious websites and files. I have strong skills in object-oriented programming, Python, and Salesforce certifications. I am looking for internships or co-ops in the fields of full-stack development or cloud computing, where I can apply my knowledge and skills and learn from industry experts.

Experience

Quadric IT
Software Developer
September 2025 - Present (10 months)
Land O' Lakes, FL

Physis Investment
Software Engineer
January 2025 - April 2025 (4 months)
Greater Boston

Salesforce
2 years 2 months
Software Engineer - Associate Technical Consultant
August 2022 - August 2023 (1 year 1 month)

Bengaluru

Developed and migrated scalable microservices-based REST APIs to GCP, automating infrastructure with Terraform, enhancing CI/CD with GitHub Actions, optimizing security with Auto-scalers, Load Balancers, and CMEK

Software Engineer - Jr Associate Technical Consultant

July 2021 - August 2022 (1 year 2 months)

Bengaluru

Integrated Salesforce with e-commerce solutions for major clients, optimizing CRM systems, reducing user bounce rate by 30%, and improving business performance with a 100 CSAT score through customized Lightning Web Components and Salesforce reports.

Resideo

Intern

January 2021 - July 2021 (7 months)

Bangalore Urban

Architected and implemented a scalable microservices-based REST API in JAVA, integrating GCP OAuth2.0, Redis, Elasticsearch, and RabbitMQ, with Docker Compose orchestration for efficient deployment and scaling

Education

Northeastern University

Master of Science - MS, Computer Software Engineering · (August 2023 - July 2025)

Amrita Vishwa Vidyapeetham

Bachelor of Technology, Computer Science · (2017 - 2021)

Sri Chaitanya College of Education

Intermediate · (June 2015 - July 2017)

Keshava Reddy School

Grade X
